SUMMARY

Passionate software developer with a love for gaming and technology. I transitioned from a career in manufacturing to pursue my dream in web and mobile development after completing an intensive Full Stack Javascript program Immersive at Hacktiv8 Indonesia. I thrive on creating innovative solutions and delivering engaging user experiences.

EDUCATION

Hacktiv8 Indonesia

Full Stack Javascript Immersive Program ([Transcript](#))

Jakarta, Indonesia

August 2024 – November 2024

AKPRIND University

Bachelor of Chemical Engineering (GPA 3.39/4.00)

Yogyakarta, Indonesia

2014 – 2019

WORK EXPERIENCE

PT. Anak Muda Digital

Full Stack Developer

Jakarta, Indonesia

March 2025 - Present

- Develop and maintain web and mobile applications using modern technologies such as **React, Next.js, Node.js, Express, PostgreSQL, and MongoDB**.
- Involved in the full software development lifecycle including feature planning implementation, testing, and deployment.
- Collaborate with UI/UX designers and QA engineers to deliver high-quality products and seamless user experiences.
- Participate in code reviews, refactoring, and performance optimization to ensure clean and maintainable codebases.

[Forage, Inc](#)

Virtual Internship

Bekasi, Indonesia

November 2024

Commonwealth Bank - Tech Explorer ([Certificate](#))

- Identified the correct groups for access to particular tools
- Analyze and identified demographics to target for advertising a new banking app

Skyscanner Front-End Software Engineering virtual experience programme ([Certificate](#))

- Completed a job simulation where I built a web application using React as a front-end engineer at Skyscanner.

- Developed a page for picking a travel date using Skyscanner's open-source Backpack React library.
- Customize my application and run automated tests to ensure it is rendered properly.

Diageo - Manufacturing ([Certificate](#))

- Completed a job simulation in which I reviewed the entire bourbon production process for the supply chain and manufacturing team at Diageo.
- Analyzed deviations from standard process parameters and identified their underlying causes.
- Evaluated downtime data and created a strategic plan to improve operational efficiencies as part of a continuous improvement mindset.

Verizon - Cloud Platform ([Certificate](#))

- Completed a job simulation involving building a hypothetical new VPN product for Verizon's Cloud Computing team.
- Used command line Python to test whether Verizon's VPN met the cloud-native traits, i.e. redundancy, resiliency and least-privilege.
- Researched approaches to achieve application security and communicated insights in a PowerPoint Presentation.

PT. Fajar Surya Wisesa
Quality Control

Cibitung, Indonesia
September 2020 – Oktober 2022

- Conducted comprehensive raw material tests and created product prototypes, evaluating their physical properties to ensure quality standards.
- Analyzed the physical properties of product samples to verify compliance with specifications and industry standards.
- Oversaw product quality assurance processes, ensuring compliance with stringent industry standards.

PT. Cemani Toka
Research and Development Engineer

Citeureup, Indonesia
February 2020 – September 2020

- Conducted raw material testing and developed prototypes, rigorously assessing the physical properties of product samples to ensure quality standards.
- Adjusted product properties based on consumer feedback and specifications, enhancing product performance and customer satisfaction.
- Designed and developed innovative products tailored to market demands, contributing to the company's growth and competitiveness.

SKILLS

Language : Javascript, Typescript

Front End : React, React Native, EJS, WordPress

Back End : Node JS, Express, Sequelize, PostgreSQL, Next JS, GraphQL, MongoDB, Redis, React API, Sequelize

PROJECTS

Sipelit

November 2024

A collaborative, mobile finance app for split bills.

Tech stack: React Native, Expo, MongoDB, GraphQL, AWS, Redis, Google Vision OCR, React Native View Shot.

k

October 2024

A minimalist web-based e-commerce platform showcasing products elegantly.

Tech stack: Next.js, Tailwind, MongoDB.

Belakangan

October 2024

A collaborative, real-time group chat application developed by a team, featuring dynamic communication and engagement.

Tech stack: Socket.io, Express.js, Node.js, Sequelize, Vite, Tailwind.

TaniMap

September 2024

A versatile web application for discovering the perfect plants for any environment.

Tech stack: React, Express.js, PostgreSQL, Google Generative-AI, Sequelize.
